FROM  
Ashish Singh  
Data Scientist / Business Analyst

Sir/Ma'am,

Greetings for the day!! Based on our conversation and your corresponding e-mail, I came to acknowledge job opportunity offered by your enterprise. I would like to encourage your benign consideration for this particular position. The credibility of your organization has sparked my enthusiasm to apply for the position of Data Scientist/Data Analyst. My ambitious interest in data analytics and machine learning combined with your prestigious organization would be a enriching experience.

Having more than 5 years of work experience within the perceptual industry, I have managed to develop strong expertise in consumer behavior research, social media activation, project management, advanced structural analysis, analytical decision modeling, advanced surveying, hyper parameter tuning, data pipeline architecture, workflow management and convolutional neural networking. Here, I'm enlisting my work endeavors that coincide with the job description and the required skills for the offered position and its key roles & responsibilities that could possibly add value to your organization.

#### **Areas of Expertise & Technical Skills:**

- ✓ Proficient in Data Science areas such as Data Mining, Data Visualization, Data Analysis, and Performance Tuning.
- ✓ Skilled in various tools and languages including Python, SQL, R, Scala, Azure Data Studio, R-Studio, Visual Studio Code, Anaconda Navigator, and Tableau.
- ✓ Experienced in using presentation tools like MS Excel (Advanced), PowerPoint, and MS Office.
- ✓ I am familiar with Big Data tools such as Hadoop, Apache Spark, Apache Kafka, and Rabbit MQ.
- ✓ Expertise in Relational & Non-Relational SQL and No-SQL databases, including PostgreSQL and Cassandra.
- ✓ Knowledgeable in Data Pipeline Architecture and Workflow Management Tools like Azkaban, Luigi, and Airflow.
- ✓ Proficient in AWS Cloud Services (EC2, EMR, RDS, Redshift) and Azure Cloud Services (VM, HDInsights, SQL Server, Data warehouse, Application Insights).
- ✓ Experienced in Stream-Processing Systems such as Scala, Apache Storm-Streaming, and Apache Spark-Streaming.

My work comprised envisioning opportunistic areas by demonstrating relevant and credible Predictive Analytics solutions and paradigms. In addition to my contributions at tech-oriented organizations and institutions, I have managed a significant portion of the research & development department. This experience has enabled me to gain valuable insights into current challenges and develop effective strategies for expanding the consumer base. I am committed to ensuring that my work aligns with the organization's needs and goals.
